

SHAGGY INU

INU'S WOOFVERSE

WOOF! wPaper

INTRODUCTION

What is Shaggy Inu?

Shaggy Inu is the ultimate experiment in decentralized community building.

At Shaggy Inu we want to push the decentralization experiment to it's ultimate limits and proof again that a token can be driven and sustained 100% by it's community.

So when we design the SHAGGY experiment, our goal is very altruistic to give an opportunity for fair distribution and ownership from day 1. This means even if team setup SHAGGY, we have no more potential for ownership that anybody else in the world. We will continue more about the ethos and vision, but first how it was done.

From its inception, Shaggy Inu will done things differently. Starting with a supply of 1 trillion, our founders, locked 50% in Pancakeswap, then "burned" the other half to Dead Address for safekeeping.

As SHAG is the ultimate experiment in decentralized spontaneous community building, after our initial launch a leaders group will be formed by a prominent group of members from our community. This groups purpose will be to allocate skills within the community to appropriate roles in SHAG's development and collectively agree on decisions for SHAG's future based on community vote or proposals. Anyone who has skills or time that can contribute into SHAG's, will be invited to help develop and advance SHAG. This group has so far been responsible for initial development, marketing, publicity, design creation & social media. SHAG's community is the beating heart of this project and will continue to evolve and expand.

TRUST

SHAG team will locked 50% of the total supply in pancakeswap and threw away the keys! The remaining 50% was burned to Dead Address. Why burn? There is no greatness without a vulnerable point and as long as Dead Address can't be accessed and someone rug us, then SHAG will grow, survive and develop. We believe everyone should have an equal chance to own SHAG, there is no team or development tokens set aside. Everyone has to buy on the open market, this meaning team have no rights for ownership more than any other holder. This will allow a fair and complete distribution to everyone in confidence that the team doesn't own tokens and they can't dump on the community.

Initial Burn can be found at following link:

Shaggy Token has been audited by Coinsult.

WOOF CLUB NFTs

WOOF CLUB NFTs are a collection of 7,000 exclusive Shaggy Inu generated Non Fungible Tokens (NFTs). They are extremely special to our creators, and forever on the Ethereum Blockchain. You'll be able to purchase, trade, and construct your WOOF CLUB NFTs.

These amazing Shaggy's, will come with various traits that make each very unique and collectible in essence. For instance Type of glasses, suits or hats, as seen on many of them, in this incredible initial collection and will form part of our upcoming game release and implementation into the current games from WOOFVERSE of other INU's friends. The upcoming game or collaboration's will allow WOOF CLUB NFTs holders the ability to use their NFTs in strategic gameplay, staking or rewards. Furthermore, each trait corresponds to an enhancement, or special ability, and at the very base showcasing the powerful SHAGGY and others INU's strenght. That factors within the game itself.

Why join the Club?

Just remember, we love our community, bringing exclusivity, and making history in the cryptospace. See you inside! WOOF! WOOF!

Minting Prices:

0 TO 1,999 NFTs — 0.1 ETH

2,000 TO 5,999 NFTs — 0.2 ETH

6,000 TO 7,000 NFTs — 0.3 ETH

\$SHAG TOKEN

Name: SHAGGY INU

Symbol: SHAG

Initial Supply: 1,000,000,000,000

Total Supply: 1,000,000,000,000

Maximum Supply: 1,000,000,000,000

Token Distribution

Initial Supply: 1,000,000,000,000

Fairlaunch: 500,000,000,000

Burned: 500,000,000,000

Token Taxation

Permanent TAX for BUY / SELL of 4%

Holder Auto Reflection: 2%

Auto Liquidity: 0.5%

Auto Burn: 0.5%

Operations: 1%
